

Sample Document

FRAPPE TECHNOLOGIES · REFERENCE SD-2026-08 · 22 AUGUST 2026

This is a sample one-page PDF. It stands in for the file named in the shell's header, so the preview can be tried with a real document: a real page, real text and a real page size. No part of it describes an actual agreement, record or invoice.

1. Purpose

The preview opens a file in place, beside the rail and the sidebar, so that reading a file does not mean leaving the workspace. The reader keeps the zoom they chose and the way back to the list they came from.

2. Scope

- 1. The pane renders the file and reports its page count in the toolbar.
- 2. Zoom runs from 50% to 150% in five steps. The page is drawn again at each step, so the type stays sharp.
- 3. Print and download act on the file itself, not on the rendered page.
- 4. A file the reader may not open never reaches the preview: the list refuses it first.

3. Summary of items

ITEM	DESCRIPTION	AMOUNT
SD-01	Placeholder line item	1,200.00
SD-02	Placeholder line item	840.00
SD-03	Placeholder line item	3,150.00
Total		5,190.00

The figures above are placeholders and carry no meaning. The document exists to give the preview something to draw at every zoom level: headings, body text set in a serif face, a ruled table and a signature block.
